CordialChart: Overview

Every rotation, charted.

CordialChart is the clinical rotation and competency tracker EMS programs actually want to use. One login carries a student from EMR to Paramedic. The charting looks like a real ePCR, so students graduate job-ready. Preceptors sign with no account. Accreditation data counts itself. It costs less than the major trackers, with volume discounts they do not offer.

Built by Cordial Fire/EMS Education, people who run EMS programs.

The problem it solves

- Students start over at every level, so their history scatters across tools.
- Preceptors fight a login when they just want to sign a student off.
- EMR and AEMT get left out by the big trackers.
- Appendix G lives in five spreadsheets until the week before the site visit.

What CordialChart does

- **One login, EMR to Paramedic.** The same account the whole way up, with all of a student's history kept, EMR included.
- **Charting that looks like the real thing.** Per patient and de-identified, modeled on a true ePCR: IV gauge and site, medication name, dose and route, airway detail, and three narrative formats (Chrono, DCHART, SOAP) a program can restrict.
- **Preceptor sign-off that holds up.** Preceptors sign from their own phone, with no account to create and never by logging into a student's account. Each signature is tied to the preceptor and locked to the record, so it stays defensible.
- **Closed-loop messaging.** Cohort, group, and private chat with read-back, named-sender attribution, and no deletes, ever. Instructors can view and export course chats, and any chart can start a private discussion.
- **Accreditation that counts itself.** CoAEMSP minimums and graduation gates fill from the charting, with a live ready-to-graduate verdict per student. Covers Paramedic Appendix G and the new voluntary AEMT accreditation.
- **Works in the real world.** Installs like an app and keeps working offline in the ambulance or the ED basement, then syncs when the signal returns.
- **Students see their own progress.** A personal dashboard shows hours by category, patient contacts, skills, patient types and ages, team leads, and exactly how close they are to each requirement.

Levels and price

One time, per student, no expiration. Teachers and preceptors are always free.

Level	Price
EMR	$24
EMT	$29
AEMT	$58
Paramedic	$79

Volume discounts: 5% at 10 students, 10% at 25, 15% at 50, 20% at 75, 25% at 100. Programs can pay, or students can.
